Nail Polish Filling Capping Machine YMGXN

The Nail Polish Filling Capping Machine is suitable for all kinds of viscosity nail polish, and fills a variety of bottle shapes and caps. Filling, brush plugging, capping and cap screwing stations are automatically finished in this one machine. Steel ball system is optional.

Features:

- PLC controlled.
- No bottle no filling and no brush plugging, no brush no capping.
- Separate filling and brush plugging stations.
- Equipped with fixing or guiding elements to ensure all stations run with stability.
- Optional filling methods: ceramic pump or stainless steel pump.
- Mechanical swing arm picks up cap from chute and places it on the bottle along with pre-rotation, solving the problem of slender caps falling off.
- Adjustable torque lossless magnetic force slipping capper, no damage to bottle and cap.

Technical Parameters:

- Volume: 5-25ml
- Capacity: 25-45pcs/min 40-80pcs/min
- Power: 1kw
- Net weight: 600Kg
- Dimension: 2000×1700×1600mm
