

INNOVATIVE TECHNOLOGY

FOR BETTER LIFE

Fully Automatic Noodles Making Machines GGMT7 Series

GELGOOG is specialized in food machinery, help you to easy enlarge business and saving labor, to win-win. Our factory tries best to sell good quality noodle making machine to you can provide excellent service. National unified quotation, strong sales team; Strong after-sales team help you use automatic noodle making machine without worries; Can start free trial for you, when you feel satisfactory then buy our automatic noodles making machine. If you are not familiar with noodles production, we can provide free processing formula for one-to-one teaching.

Performance of Automatic Noodles Making Machine

- Automatic dough sheet folding: Width of 260mm, adjustable thickness.
- Automatic dusting powder, powder amount can be controlled.
- Automatic dough sheet rolling, which can be used according to the actual needs of customers.
- Automatic noodles cutting, and the length of noodles is 50cm (adjustable for noodles length).
- Variable frequency speed adjustment: The machine is equipped with three frequency converter control, enhanced operability, three deceleration motor drive, dynamic power.

Manufacturing Process of Noodles:

First, mix the flour first, then add appropriate amount of water for mixing, after well mixed, pour the mixed flour our into the machine hopper.

Second, dough kneading and pressing: First group of noodles roller uses twill roller, no slippage, no adhesion, no breaking, greatly increase the pressure and strength of noodles, during the pressing process, we adopt frequency conversion speed.

Third, cutting noodles: Noodles forming plays an important part in noodles production. Automatic cutting adopts high precision hob, durable, equipped with a conveyor platform, easy for picking up noodles.

If you just want to make dough sheet: When making dough skin, remove the cutting knife from the machine, then pour mixed flour into the machine hopper, then can finish dough sheet production, this machine can make all kinds of wrappers, high yield, ultra-thin skin can reach 0.4mm thick with automatic double flour spraying sevice, spraying uniformly, not leaking powder, the amount of powder can be adjusted freely.

Technical Parameters:

Model	GGMT7-260	GGMT7-300	GGMT7-350
Width of Dough Sheet	260mm	300mm	350mm
Size of King Roller	140*260mm	140*300mm	140*350mm
Capacity	260 kg/h	300 kg/h	350 kg/h
Power	4kw	4kw	4kw
Weight	900kg	1000kg	1200kg
Dimension	3200*680*1370mm	3200*680*1370mm	3200*780*1370mm
