

Automatic Glue Labeling Machine YQJH-100

Application

This machine can be used for beer, wine and other glass bottles, PVC or pet bottle glue label; it is easy to operate and to connect to other production lines. Adopting stainless steel materials make the production process environmental and healthy. The using of advanced technology makes the labeling machine more effective and accurate.

- Applicable label: Paper label (without paste, the paste will daub by the machine).
- Applicable product: Required to be labeled on the Circumference of surface or other Curved surface.
- Application industry: Food and beverage, chemical industry, pharmaceutical industry, wine bottles

Main technical parameters:

Operating direction	Left or Right
Labeling Accuracy	±1.0 mm(subject to the roughness of the plane)
Production(bottle/min)	30-80BPM(according to the size of bottle and label)
Labeling Speed(m/min)	≤30
The application of bottle	Outer diameter 40-100mm Height 35-200mm(can be customized according to customer' requirement)
The application of label	Width 8-150mm ; Length 20-280mm(can be customized according to customer' requirement)
The power of motor(w)	1KW
Voltage	AC220V 50/60HZ Single phase
Size appearance(mm)	2500(L) 900(W) 1270(H)mm
