

Line Chain Scraper Conveyor CM-BL

Features:

- Adopt frequency conversion speed regulation; the conveying speed can be adjusted freely within the specified range.
- Simple structure, convenient operation, low working noise, stable and reliable conveying.
- The bracket of the whole machine is made of stainless steel and covered with glass fiber reinforced plastic sheet or made into stainless steel sheet according to requirements.

Technical Parameters:

- Material quality: stainless steel 304; thickness: 2.0mm;
- Conveyor belt (length x width x height): 8000 mm x 750 mm x 750 mm;
- Conveying belt: chain type, width: 300mm, flush with the platform;
- Platform surface (glass reinforced plastic): width: 200mmx2, thickness of 10mm, narrow side: 25mmx2;
- Conveying motor power: Taiwan Taibang Motor 0.75KW;
- Load capacity: 100KG.
