

DS1000G Granule Packing Machine

It's suitable to use in automatically packing any loose, no adhesive, granular materials of foodstuff, medicine, and chemical industry. Such as puffy food, fried food, shrimp slices, chips, peanuts, melon seeds, oatmeal, fragile food, instant drink, desiccant, sugar, salt, washing powder etc.

Structure:

it include machine body, filling system, sealing system, heating system, hopper and control system.

Process:

Automatic detection -- automatic filling -- automatic bagging -- automatic sealing -- automatic cutting

Character:

1. This machine is a stand one. It can automatically finish counting the quantity of bags, filling, sealing, slitting and counting. It can pack with the packaging materials like polytene, BOPP film and tea filter paper.
2. This machine adopted photoelectric cells and auto constant temperature device, stepless speed governor, programmable controller PLC and auto counter.
3. It can automatically display the packaging speed and number of bags.
4. This machine is of simple construction, operation and reliable running. The packaging is of stable quality and the outlook is flat and beautiful.

Parameter:

Model	DS100P	DS500G	DS1000G
Packaging quantity	<100g	100-500g	200-1000g
Speed	50pcs/min	30pcs/min	20pcs/min
Packaging size	L:40-180mm,W:30-140mm	L:40-250mm,W:30-180mm	L:80-280mm,W:50-180mm
Power supply	220V 50Hz (accept customized)		
Voltage	1.5kw	2.3kw	2.4kw
Weight	300kg	360kg	380kg
Overall measurement	900*800*1700mm	1100*830*2100mm	1100*830*2200mm
Sealing form	3 sides ,4 sides sealing and pillow back sealing
