

## ***Automatic Granules Packaging Machine CK320/CK350/CK480***

Kuli kuli packing machine is a kind of vertical granule packing machine, which can pack various snacks like kuli kuli, chin chin, dal, snack pellets, seeds etc. and the package is injected into the bag, and the horizontal sealing mechanism is colored according to the color.

During the packaging process of the kulli kuli packing machine, the material is fed by the material stretching and feeding device, and the plastic film is formed into a cylindrical shape through the film cylinder, and the side surface is sealed by the heat longitudinal sealing device, and the package is injected into the bag, and the horizontal sealing mechanism is colored according to the color.

The standard photo detection device cuts the package length and position. The vertical granule packing machine is suitable for packaging of granulated strips, short strips and powder strips such as puffed food, shrimp strips, peanuts, popcorn, oatmeal, melon seeds, jelly, white sugar, salt, dal, cashew nuts, chin chin, etc

### **Equipment features of the kuli kuli dal packing machine:**

1. Product packaging, printing date is completed once. Save time and save costs;
2. Optimized structural design, disassembly, cleaning is more convenient;
3. Horizontal and vertical sealing temperature independent control, better adapt to various packaging materials;
4. According to the material conversion opening and closing mode metering device.

## Technical Data

Model	CK320	CK350	CK480
Total Power	220V/2.5kw	220V/2.5kw	220v/1.8KW
Capacity	10-100ml	40-200ml	200-1000ml
Width of film	80-280mm	80-300mm	180-420mm
Bags size	L : 30-180mm w : 30-130mm	L : 30-280mm w : 30-140mm	L : 40-300mm w : 80-200mm
Machine size	820*980*1680mm	820*980*1980mm	900*1100*2080
Weight	300kg	300kg	450kg
Thickness of film	0.03mm-0.07mm	0.03mm-0.07mm	0.04mm-0.08mm
