

Jelly Filling Machine

The jelly packing machine is designed for pack jelly products. It is easy to operate, with a user-friendly interface that allows for quick setup and customization of packaging parameters.

Product Packaging Details

1. The jelly filling machine can be customized with 4-16 lanes of packaging channels according to customer needs. Each channel can unload materials individually or uniformly to achieve efficient packaging.
2. The jelly filling machine whole machine is made of 304 stainless steel, and the material contact part can be customized with 316 stainless steel according to demand to ensure food hygiene and safety.
3. Automated packaging process, reducing manual operations and improving production efficiency.
4. Whether it is viscous or thin, our machines can achieve high-level packaging.

Technical Parameters

Model	WP-680YS
Lanes	4/6/8/10/12 lanes
Bag Style	3-side seal
Filling Accuracy	≤±1%
Capacity	200-400 bag/min
Size of Bag	L50-200mm W20-80mm
Range of measure	1-100ml/bag
Voltage	AC 380v 3 phases 50Hz
Power	380V 28KW
Weight	480-880KG
