

LTPK LT-XG1870P Automatic Capping Machine with Cap Unscrambler

With a cap vibratory bowl, the machine can automatically sort and feed the caps. There is a rubber head for anchoring the cap. It applies 4 spinning heads to screw the cap, which makes it multipurpose. Also, it can be assembled with a filling machine and a labeling machine to form an automated production line.

Application

This machine is suitable for many different kinds of screw caps, such as plastic screw cap, dispensing closure for salad dressing (with inner seal), break-away closure for syrup, dispensing pump closure, dispensing closure (with inner seal), spray pump, metal closure on glass jar, child resistant closure, cap on toothpaste, measuring cap, etc.

Technical Parameters

Model	LT-XG1870P
Voltage	AC220V/110V 50-60HZ
Power	200W
Bottle Height	60-270mm
Cap Diameter	18-70mm
Working Speed	20-40 bottles/min
	(depending on bottle and caps)
Conveyor Length	1117mm
Working Pressure	0.4-0.6 MPa
Size of Air	OD 8mm
Compressor Connector	
Dimension	About 2100*580*1200mm (Machine)
	About 500*500*1180mm (Vibratory Bowl)
Packing Size	About 1140*615*1105mm (Machine)
	About 1165*680*710mm (Vibratory Bowl)
Net Weight	About 85kg (Machine)+
	About 88kg(Vibratory Bowl)
Gross Weight	About 114kg (Machine)+
	About 116kg(Vibratory Bowl)
