

Dropper Bottle Filling Machine

It can put E-liquid, essential oil and vg-pg seed oil into various round bottles, which can be filled with 5-50ml. Provide a regular positioning cam and cork plate with high precision; The acceleration cam moves the head up and down; Continuously rotate the screw cap of the arm; Peristaltic pump to measure the filling volume; Any operation can be carried out through the touch screen. Without bottles, filling and capping, the position of the machine is very high.

Five Competitive Edges of Our L40 Dropper Bottle Filling Machine:

1. It is controlled by microcomputer and can be filled with high precision.
2. Stepless frequency conversion is used to adjust speed, which can automatically control production capacity.
3. If there is no filling, or if there is no lid, it will stop.
4. When a fault occurs, it will automatically give an alarm, which can be used on low pressure, no filling and no inner cover.
5. The machine can automatically and quantitatively control the production capacity.

Technical Parameters

Filling Volume	5-50ml
Capacity	30-40 bottles/hour
Filling Precision	$\leq \pm 1\%$
Power Supply	380V/50Hz (Can customize)
Capping Rate	$\geq 99\%$
Stoppering Rate	$\geq 99\%$
Air Supply	1.3 m ³ /h 0.4-0.8Mpa
Power	2.0Kw
Weight	850kg
