

## ***BD-30 Automatic Powder Packaging Machine***

BD-30 Automatic Powder Packaging Machine. Powder Packing Machine. The process of measuring, bag-making, filling, sealing, printing and cutting can be done automatically. The packaging machine can pack many kinds of material such as grain, powder, liquid and tablet, etc. Purpose: Grain kind: The thin grain material such as leech dom of dosage or pill kind, sugar, coffee. Powder kind: Milk powder, bean powder, condiment, humid pesticide powder. Adopting PLC controlling system. You need only set parameter (filling volume, bag-length, etc) on the visible setting cell, and the system will match various acts automatically to achieve excellent packaging speed. Photo electricity examining system is stable and reliable to ensure the whole brand of packaging bag. The temperature is controlled intelligently by both heat-sealers. Packaging different material such as powder, grain, liquid and so on by changing filling mechanism. Lapel style bag-making mechanism. The calm and beautiful pillow-bag can be suited for wide range. Optional devices: The above machine may be equipped with hot stamp imprinting machine. The machine that has special bag-size or measuring requirement can be devised and produced specially. And elevating hopper feeder.

**Technical Parameters:**

<b>Model</b>	<b>BD-30</b>
Production Capacity	20-50 bag/min (depend on the material and specifications)
Pouch Length	100-300 mm
Pouch Width	100-180 mm
Seal Style	Pillow
Filling Volume	100-1000 ml
Measuring Method	Auger
Applicable Film	Polypropylene/ Polythene, Polyester / Aluminum-foil /Polythene Polyester, Aluminum-plating / Polythene, Nylon / Polythene, Polyester / Polythene.
Air Consumption	0.3 L/min
Power	380V,50Hz,2.5Kw
Packing Size	1470*920*2800 mm
Packing Weight	800 Kg
