

## *HL AV High-end Labeling Machine for Round Pharmaceutical Products*

HL AV is a high-end labeling machine for round pharmaceutical products such as vials, ampoules and cartridges, etc. It is ensuring correct container positioning and label application precision in high speed. Also it is the first labeller in Korea to apply a sticker reject function, maximizing production efficiency. Modular construction thanks to flexible integration with easy maintenance.

### **Features**

- Herma 500 label header & Servo driven system
- SUS 304 + AL6061 hybrid system
- Modular label dispenser design
- Available for inferior label rejection system ( option )
- Available for label printing and camera system ( option )
- HMI touch screen
- Available for 21 CFR Part 11

### **Specification**

Model	HL AV
Output	400 products /min
Format range	D/10 - 50 x H/30-100 mm
Label size	W/12 – 100 x H/12-76mm
