

LDBK280/LDBK560 Automatic Sugar Salt Stick Bags Filling And Packing Machine

It is used for automatic filling of various granules into stick bags, such as sugar, salt, coffee, seed, sesame, desiccant, desiccant, health products Industry and so on.

Features:

1. Multi lanes machine can produce multi lanes bags at same time.
2. Machine main function: automatic split film at right position, liquid measuring and filling, multi lanes bag form fill seal, cutting, sensor tracking, and counting capacity.
3. Other function: Emergency stop, set capacity to auto stop machine, count capacity and Zero the count, ready bag output, manual test machine each step etc.
5. Stainless steel contact part and the machine outer shell, high feature for liquid running environment.
6. High precision photocell sensor for auto tracking the eye mark printing on the film roll, so cut each bag at precisely position.
7. PLC controller, high function and control the whole machine's work steps.

Specification:

Model	LDBK280	LDBK560
Filling Method	1. Volumetric cup 2. Weigher	
Film width&Thickness	Max.280mm,	Max.560mm,
	0.07-0.10mm	0.07-0.10mm
Packing speed	30-40bag/min/lane	
Air consumption	0.8mpa	
Sealing type	Backsealing/ Stick bag	
Powder	3.5KW	5.5KW
Machine Weight	350KG	550KG
Dimensions (mm)	1385(L)*918(W)*2005(H)	1685(L)*1300(W)*2005(H)
