

## *Horizontal Packaging Machine for Granular Products*

This machine can be used to fill and package granular products into the 4 side seal sachet-type packages. This 4 side seal sachet packaging machine is used to produce a single-piece sachet of a 4-side sealed bag. It can do the work of folding, cutting, bag-forming, code-printing, and counting. Fully stainless steel body. PLC based with a touch screen this HFFS machine for Free Flowing Granular products is very simple to operate and simple to set up. The sachet size range that the base machine produces is 60mm x 80mm, up to 130mm x 150mm, with speeds up to 60-75 sachets per minute. The speed doses vary depending on the intended weight range in each sachet and also the sachet dimensions as well.
