

## *HP-450H / HP-600H Horizontal Standard Flow Wrapper*

The standard high-speed packaging machine is equipped with an electronic display screen for easy monitoring of error messages and machine information. Its robust and durable structure ensures simple and straightforward maintenance. This machine is ideal for standalone operation or integration into basic automated packaging systems.

### **Features**

- User-friendly human machine interface control with 4.3inch touch screen for convenient operations.
- Compact construction for reducing space required.
- Bag length indication ensures fast and accurate length adjustment.
- Optional feeding systems are available for various products.
- Equipped with precision photocell sensor for film tracing control.
- The machine stops automatically when the film runs out.
- Four sets of temperature controllers.
- All product-contacted areas are in stainless steel or plastic construction.
