

ZT-260 Vacuum Tray Sealer For Cuisine For Fish For Meat

The ZT-260 vacuum packaging machine is designed to tightly conform packaging materials to the surface of products. It is typically used for small batch production or in applications requiring manual operation. The machine heats and adheres thermoplastic packaging materials (such as plastic films) to the product through manual operation, completing the packaging process.

Product Description

Advantage

- **Material Construction:** Made of aluminum and stainless steel.
- **Vacuum Feature:** Equipped with a suction port on the side to adsorb the film, ensuring a tighter fit without wrinkles.
- **Heat Insulation:** Features heat-insulating technology on the cover for increased safety.
- **Customizable Molds:** Can be customized with molds of any size according to the customer's box specifications.
- **Compact Design:** Small and sleek, suitable for countertop placement.

Description

The Vacuum Tray Sealer is an advanced sealing equipment designed for packaging tray-based products using vacuum and sealing technologies. This machine ensures that products remain fresh and intact during transportation and storage by removing air from the packaging. Widely used in food processing, pharmaceutical packaging, electronic product packaging, and other industries, the vacuum tray sealer is an ideal choice for high-volume production environments.

Technical Parameters

Model	ZT-260
Voltage	1Phase 110/220V 50-60Hz
Pump Power	1.5kw
Pump Capacity	141.3cft/h(4m ³ /h)
Tray Size	9.8 × 6.7 × 0.8 inch
	(250×170×20mm/Custom)
Dimension	20.3 × 15.9 × 15.3 inch
	(515×404×389mm)
Weight	55.1 lb(25kgs)
Certification	CE ISO
