

Automatic High Speed Candy Packing Packaging Machine Confectionery Sweets Flow Wrapping Machine JY-ZB1500

The JY-ZB1500 high-speed fully automatic pillow packaging machine is suitable for the automatic arranging and packaging of solid, regularly shaped granular items, such as candies, chocolates, beef granules, preserved fruits, and similar products. It can achieve full automation from the output port of the forming equipment through docking conveyors, sorting, and packaging according to customer requirements. Furthermore, it can be customized in various ways to meet the output requirements of supporting forming equipment based on customer needs.

Performance Characteristics

1. Equipped with a triple-servo touch screen control system.
2. Features an oversized material arranging tray for effective sorting and low empty package rate.
3. Individual machine sections support independent operation, facilitating convenient maintenance and debugging.
4. Excels in high-speed stable operation, excellent sealing performance, and rapid packaging speed.
5. Bag length adjustment requires only touch screen settings—operates directly. Cutting position and feeding position can be modified anytime via the touch screen during operation stops.
6. Servo-driven transmission offers a simple structure and user-friendly operation.
7. 304 stainless steel frame ensures food-grade safety compliance.
8. Dual-roll film system enables non-stop packaging film replacement.

Technical Parameters:

- Voltage: 380V 50Hz
- Total Power: 4.5KW
- Weight: 1526KG
- Dimensions: 3055×1437×1780mm
- Compatible Products: Discs, spheres, squares, rectangles, ellipses, cylinders, etc.
- Bag Length: 45-120mm
- Max Speed: 50-1500 pcs/min
