

QDG air drive tube filling machine

This machine is applied to filling ointment or liquid into various tubes or other container, specially, it can fill small caliber tube or bag.

This machine can convenient solve the exhaust problem when filling small caliber tub form container or bag. The flexible tube releasing device attached with it can have the bottle receded in a coordinated mode during filling to get an automatic exhaust and flexible tube nozzle cleaning.

This machine uses the compressed air as the power, without any power supply.
This machine is ideal filling equipment to plastic tube, metal tube and Al-plastic composite tube.

Technical Parameters:

Air pressure	0.6 MPa
Working pressure	0.1-0.5 MPa
Filling volume	1-10ml,10-150ml,30-200ml,100-500ml,500-1000ml,1000-2000ml
Filling speed	20-60 bottle/min, 40-50 bottle/min
Filling accuracy	1.5%,1%
Air consumption	0.035m ³ /min, 0.045 m ³ /min
Overall size	450x450x1750 mm
Weight	80 kg
