

SED-80LP Pharmaceutical Packaging Machinery Equipment Bottle Unscrambler Collecting Machine

The high-speed bottle unscramble consists of a bottle lifting device, a bottle finishing device, and a bottle unscramble mainframe. It is a new generation of electromechanical integrated bottle unscramble. It is suitable for bottles of various shapes and solves the problem that only round bottles and square bottles can be unscrambled on the market.

Feature

1. Applicable to a variety of round, square, flat, shaped plastic bottles of different specifications.
2. The whole machine makes of 304 stainless steel, which is safe and hygienic, and easy to clean and disinfect.
3. It equips with touch screen operation, PLC control, and has functions such as counting, working parameter setting, and display. Easy to operate, easy to adjust within the parameters.
4. The special bottle arranging mechanism makes the bottle-out speed fast and ensures the bottle supply-demand of the high-speed bottle line.
5. It equips with the bottle quantitative control detection and the overload protection device to ensure that the bottle enters the next step in the correct state.

Product Parameters

Product Name	SED-80LP Capacity 2500pcs/H Beverage Automatic Bottle Unscrambler Collecting Machine Weight 300kg
Product model	SED-80LP
Rated voltage	220V 50HZ
Conveying capacity	30-100 bottles / min
Applicable bottle type	Round,square and shaped bottles
Material	304 stainless steel
Rated power	0.25kw
Host weight	230kg
Outline size	1350×1000×1270mm
