

Double colors automatic capsule printing machine RPD-4

1. Machine Description

PRD-4 model high speed oriented capsule double-color printer is the newest product developed by our company. We used two patent technologies, one is capsule's cap and body oriented system, and the other is two color printers. It can print character, picture and trademark according to the needs of the customers, on all kinds of capsule for circle or axial printing, Because of capsule's cap and body oriented and double-color printing at one-time, the printed effects are more varied and colorful. The single row printer can satisfy the demands of printing in small batch and many varieties, it is obvious in economical effects. It is considered as an ideal printing equipment for the capsule production and pharmaceutical enterprises.

2. Features

It's designed to be used in all kinds of capsule orientation and double-color printing. It is operated conveniently by applying the advanced changeable frequency control system. It has been perfectly fused with machines, electronics and aeromechanics, also made it perfect product printing on capsules. Automatic arithmometer system gives you many conveniences. Two color printing is more handsome.

3. Main technical parameters

Capacity	<100,000pill/h
Circle scope to print on capsule	<100,000pill/h
Power	AC 380V,50HZ
Consumption power	1.7KW
Weight	500kgs
Machine size	2110mm*400mm*1860mm
