

## ***WK-255 Medical Capsule Filling Machine***

This machine is a new product has been researched into and developed according to the capsule filling and shrink fitting. It is a combined conveyor system, it is composed of capsule arranger (cap and body), shrink fitting plate, fore shafting machine. Compare with high speed machine, reduce the operator lessen the work area, fitting for capsule arranging shrink fitting in mini pharmaceutical factory, hospital medical department laboratory.

Applied in 00# - 4# capsule for shrink fitting of capsule cap and body, medical power filling.

Low cost, operate freely. Convenient repair and maintenance, low power loss, high production efficiency, one machine is multi-purpose etc.

Product capacity	255 capsules each time according to the proficient degree of variably 30-50 seconds per time. It produces 160,000-250,000 capsule each shift
Power	AC 220V 50HZ±15%
Power consumption	470W
Overall size	1150 x 560 x 1050 mm
Weight:	160 KGS
