

## *NJP-900A Full Automatic Capsule Filling Machine*

Automatic Capsule Filling Machine has been designed and developed to fill hard gelatin capsules with powder or pellets. It is an extremely durable and reliable machine that fill dosages to the highest accuracy. It can be applied the wide range of capsules at all sizes and guarantee the integrity of all capsules

### **Feature:**

1. All-seal, structure, meet G.M.P standard;
2. The module and back wheel is integrated rotation, this most stable structure, after prolonged use of proven.
3. Big size dosing disc, high dosing accuracy;
4. Reasonable filling tank round design, especially suitable for filling proprietary Chinese medicines;
5. Separated bearing block for main transmission shaft, easy for, maintenance and fix;
6. Groove wheel indexing mechanism, indexing accuracy, long life;
7. Using Japan Mitsubishi inverter driving, steeples speed regulation, Japan Mitsubishi PLC program control; Transformer driver; steadily working; reliable.
8. Suspension touch-tone operation is easy to operate economical and practical, durable, has the timing, quantitative and capacitive sensing next makings two functions optional;
9. Configure the pellet mechanism

**Technical Data:**

<b>Model</b>	<b>NJP-900A</b>
Production efficiency	900 Capsules/min Max.54000Capsule /H
Index table	12 partitions, seal type
Capsule size for Powder	00#~5#
Capsule size of Pellet device	00#-5#
Row	Single
Hole number	9
Dividing device	Groove Wheel
Main Power	1.5 KW
Total power	4 KW
Weight for main machine	1450 kg
Dimension of main machine	1200×1200×2027 mm
Annex machine	XCL-36 Cleaner 1 set, Waterpot 1 pcs. WA
