

Automatic Horizontal Labeling Machine for Tubes HL-T-402

HL-T-402 Suitable for the unstable circular cylindrical objects, semi circle labeling, horizontal transmission, horizontal labeling way, increasing stability, improving the labeling efficiency.

Optional printer or inkjet coder attached to the labeling applicator, it can print on the label production date, batch number and barcode printing information.

Optional printer or inkjet coder attached to the labeling applicator, it can print on the label production date, batch number and barcode printing information.

Core working principle: The sensor detects the product passing through after the product is separated by the bottle dividing mechanism, and then returns the signal to the labeling control system, which controls the motor in the appropriate position to send the label to be attached to the labeling position.

The product flows through the labeling device; the labeling tape rotates the product; and the label is rolled over; thus a label's sticking is completed

Technical Parameter:

| Model | HL-T-402 |
|-----------------------|--|
| Labeling Accuracy | ±0.5mm |
| Labeling Speed | Stepping: 100~200pcs/min Servo: 150~300pcs/min |
| Applicable Dimensions | φ10mm~φ22mm |
| Applicable Labe Size | Length:20-100mm Width:20-110mm |
| Power Supply | 220V/50HZ |
| Weight | 200KG |
| Machine Size (LxWxH) | About 2050mm x 650mm x 1450mm |
| Delivery Time | 10-15 Days |
| Type | Manufacture, Factory, Suppier |
| Packaging | Wooden box |
| Shipping Method | Sea.Air and Express |
| Payment Term | L/C, T/T, Money Graml etc |
