

JFP-110A Capsule Sorting Polisher

JFP series capsule polisher is an advanced capsule polishing machine with the filtrating function. The whole machine is made of stainless steel; fast connection of roller brush leads to disassemble easily and clean thoroughly; frequency inverter controls the speed of the motor, so it can bear big start-up force and run very stably and reliable. It is not only applied to polishing capsule, tablet and eliminating the static electricity, but also applied to ejecting empty capsule, little dosage capsule, separated capsule and fragment. This machine is suitable for all sizes of capsules.

Power supply	220V/50HZ
Power	180W
Productivity	6000 pcs/min
Vacuum dust clearing	2.7m ³ /min -0.014MPa
Compressed air(Prepare by yourself)	0.25 m ³ /min 0.3MPa
Overall dimensions	1000×600×950 mm
Weight	43kg
