

## V-1 Mini Powder Mixer Machine

The Mini V Type Powder Mixer Machine V-1 has a number of features which make it the best choice for use in any laboratory:

- It is compact in size
- It is lightweight and easy to operate.
- The cylindrical structure is the distinguishing feature and the mixing ability is well-proportioned and efficient with no blind spots in the cylinders and no accumulation of materials.
- Made from shiny stainless steel, the mixer is equipped with programming control functions which set the timings for forward and reverse rotation and for regulating the rotation speed.
- It has a safety system which stops the mixer rotating when the safety cover is opened.
- This machine is suitable for use in the pharmaceuticals, chemical and food industries for mixing powder or granular materials.

### Specifications

Model	V-1
Volume	0.25L
Available Volume	40%-70%
Rotational Speed	10-60r/min
Weight	8kg
Power	50W
Voltage	220V/110V
Dimensions	50x22x22cm
