

## Automatic Pharma Box Collating & Banding System/Automatic Banding Machine YLM-ABM-30

This automatic banding machine, with the box/carton collating & stacking system, is for automatically bundling pharma boxes by film strip.

### Introduction:

In pharmaceutical manufacturing, when pharma boxes come out from the cartoning machine, we sometimes band several pharma boxes together as a bundle with a packaging film band (BOPP). This system first collates all pharma boxes and then stacks a certain number of them, finally pushes them through an automatic banding machine to complete the banding. The whole process is fully automatic and with speed up to 35 bundles per min.

### Specifications:

Model	YLM-ABM-30
Bundle Size	L:40-360, W:30-200,H:10-200(mm)
Speed	30-35 bundles per minute
Strap width	28mm 38mm 48mm
Operating platform	720-820mm
Voltage	220V 50HZ or customized
Power	0.6kw
Air Pressure	0.4-0.6(Mpa)
