

Automatic Telescopic Filling Machine

These Machines are uncomplicated as well as have Compact Design. Their speed can be altered as per requirements. These machines are energy efficient and are easy to operate. They can be operated by any ordinary layman. These Telescopic Filler Machines have the advantage of single head as well as double head. Because of their low maintenance and high affordability they are in immense demand in the market. These Telescopic Cup Filling Machines are corrosion resistant and rust-proof, operate with very good speed and have a very excellent performance. Apart from that they have high impact resistance, have good tensile strength and are very durable.

Features:

- Changeable speed
- Least power consumption
- Easy to Operate
- Low maintenance
- Single and Double Head
- Corrosion resistant and rust-proof
- High affordability

Applications:

This machine is apt for filling granular products like Tea, Sugar, Salt, Pulses, Grain, Spices, Tablet etc.

Technical Specification:

Range	0.5 gm to 1000 gm. (Different types of Machines)
Speed	6 to 25 Fills Per Minute.
Packing Material	Pouch, Jar and Bottle.
