Auto Glue Labeling Machine GBL-M

It is very troublesome to replace each time when the specifications of the labels differ, in order to reduce this kind of inconvenience, we have developed this automatic labeling machine which only requires a minor adjustment and replacements of a few parts to solve the above mentioned trouble. It save your production cost and is very easy to operate. It comes up with a fast and unified production to ensure a efined outlooks of the bottles to be labelled. All face panels and transmission belts are made of stainless steel, so that there will be no rusty and you can be assured of its durability and a clean working machine.

Specifications:

Bottle Diameter	16-40mm
Label size	H 20-80mm, W50-100mm
Speed	40-60 bottles per minutes
Motor Power	1/2 HP & 1/4 HP
Source Power	220V/380V, 50/60Hz
King of Paste	Resin
Machine Dimension	L2200*W900*H1500mm
Machine weight	500 kgs
Air pressure	3-6 kg
Vacuum press consumption	10L / minutes
