## *Bagged Liquid Packaging Machine*

This bagged liquid packaging machine produced by Shanghai Shigan adopts a stainless steel body design and has good anti-corrosion characteristics. The vertical automatic packing machine is also equipped with intelligent computer control, which can set temperature, bag length, and stable film delivery, thereby improving work efficiency, Reduce labor intensity. This machine can complete various tasks such as bag making, filling, counting, sealing, slitting, output of finished products, labeling, and printing at one time.

### **Specification Parameter:**

- Bag size: (width \* length) 120-180 millimeters (mm)
- Packing speed: 20-60 bags/min (bag/min)
- Measuring range: 1-1500 g/ml
- Measurement accuracy:  $\pm 3\%$
- Power supply voltage: 220V50Hz (380V can be customized)
- Work rate: 1.8KW (heating 180w\*4)
- Machine weight: 320 kilograms (kg)
- Dimensions: (length \* width \* height) 750\*700\*1750 cubic millimeters (mm<sup>3</sup>)
- Sealing form: four-side seal, three-side seal, back seal
