

Multi Line Granule Packing Machine BSP-280BK/BSP-560BK

This machine is suitable for the mass production and packaging of medicine, health care products, food etc in granule state, such as: traditional Chinese medicine granule, coffee, sugar, small pills etc.

Packing Materials

The thickness of aluminum plastic composite film, aluminum plated film, paper plastic composite film, and plastic composite film with hot melt type inner layer ≥ 70 micron.

Features

Originated from European technology, designed by our senior engineer with more than 10-year experience based on European standard, using integrated control of automation, advanced human-machine interface touch screen, automatic correction function for packaging film and automatic positioning and tracking function with cursor, with docking device for the connection of each roll of packaging film and automatic alarm function in case of failure.

Technical parameters:

Model	BSP-280BK	BSP-560BK
Line number	4-6	8-12
Packed item	Granule, powder, liquid, sauce	
Capacity	Max. 35 bags/min/line	
Bags size	L: 50-180mm	L 50-180mm
	W:17-30mm	W 17-30mm
Film width	280mm	560mm
Film thickness	0.04--0.10mm	
Sealing type	Stick bag, 3 sides sealing	
Cutting type	Straight cutting, zig zag cutting, round corner cutting	
Film material	Laminated film,like PET/PE,PAPAER/PE, NY/PE, PET/AL/PE..	
Air consumption	0.8Mpa 0.8m3/min	
Power	1N+PE/50HZ/AC220V(380V) /3.5KW	1N+PE/50HZ/AC220V(380V) /5.5KW
Dimension	L1385 x W918 x H2005mm	L1685*W1300*H2005mm
