

SFJ-2 Powder Auger Elevator

SFJ-2 Powder Elevator is made up with the hopper, material conveying mechanism and control unit. It is suitable for the conveying of powder with good fluidity and granule. The whole machine is made with SUS304, and it has the function of good anti-corrosion.

Features:

1. France Schneider AC contactor and thermal relay control, it has the protection of overload and short circuit.
2. Linkage control: it will automatically start when there are not enough products in the hopper and it will stop when the product reaches the level. When the continuous product feeding time exceeds the setting value, it will stop and alarm to avoid the damage to the motor.

Technical Parameters:

Pipe Diameter	102mm
Conveying Capacity	500-3000 kg/hour
Power	1.5KW
Power Source	Three Phase, AC 380V
Frame material	SS304
