

Semi-Automatic Capsule Filling Machine DTJ-C

This model is an intermittent motion and hole plate type filling full automatic capsule filling equipment. It adopts an optimization design for meeting the characteristics of Chinese medicine and the requirement of GMP, it has the characteristics of compact mechanism, small volume, lower noise, precision filling dosage, multi-function, stably running, etc.

Technical Parameters:

Model	DTJ-C
Speed	Max 25000capsules/hour
Capsule Size	00#, 0#, 1#, 2#, 3#, 4#,5#
Filling Material	Powder
Noise	≤60dB (A)
Power	220V/380V 2.2KW
Weight	500kgs
Packing Size	1800x800x1800mm
