

GXT-4 Filling and Capping Machine with Labeling

This production line is suitable for the filling production of small batch multi-gauge, liquidity or viscous materials. It only needs 2 operators to complete filling, capping, labeling and packing. The line structure is compact, small footprint, which will help the workshop planning and adjustment.

GXT-4 Filling Capping Labeling Machine is made of high-quality stainless steel SUS304, with excellent anti-corrosion performance. The machine consists of four independent operation of the pneumatic piston filling unit, rotary alternating grasping, capping head and cover cap device and the cylinder pressure bottle institutions, self-adhesive labeling agencies. Filling, capping and labeling can be done once. The whole machine has the advantages of compact structure, small area, easy cleaning, simple operation and convenient and quick change of product. It is suitable for the filling production of non-viscosity or high-viscosity materials of multi-product and small-batch, which can save the most. Human resources (1 person can operate).

Main Parameters:

Applicable bottle diameter	Φ40-90 mm H: 80-230 mm
Cap Specification	Φ20-50 mm H: 15-30 mm
Label size	L: 50-320 mm W : 20-140 mm
Volumes	80~1000 ml
Measure precision	±1% 200 ml , ±0.5% 200-1000 ml
Label precision	±1 mm
Production capacity	≤1000 bottles / hour
Air pressure	0.5-0.7 Mpa
Power source	220V, 50Hz
Total power	3.0 KW
Weight	1200 KG
External dimensions	2430*2000*2400 mm (L*W*H)
