

DZP-420D Paper Plastic packaging Machine

This machine adapts to pack commodity, small hardware, medicine and like paper plastic packaging to improve the brand of products. Packaging products: such as battery, toothbrush, injection, pen and so on. This equipment is a new-generation packaging equipment, which scientific research employees in my factory have successfully researched by continuously improving and creating. This machine adopts man-machine interface, frequency conversion adjusting speed, adjustable makeup. It adapts to pack different page with the features of convenient operation, endurable usage. The outside appearance of the whole machine uses stainless steel, so it is clean and sanitary. It is the most perfect packaging equipment at present, for it is equipped with safe urgent stop device to make sure the lash-up measures during production and add the safety factor of operation.

Main technical parameters:

Punching and cutting times(t/min)	6-21
Travel range(mm) (mm)	20-180(Servo motor automatically adjusts it)
Air pressure(MPA)	0.5-0.8 Air Flow Rate \geq 0.5m ³ /min
Total Power of Power Supply(KW)	380v 60Hz 9KW
Power of main motor(KW)	1.5
PVC Hard Chip(mm)	(0.15-0.5) \times 420
PAPER BOARD(g)	(300-750) \times (design according to customer's demands)
Overall Dimensions(mm)	3500 \times 860 \times 1700
Weight of whole machine(kg)	1850
