

BG32A-1 Automatic Cup Filling and Sealing Machine

Summary:

BG32A-1 automatic fill-seal-cut machine is widely used in filling and sealing various kinds of plastic cups for liquid. It can automatically complete the processes of cup-dropping, filling, sealing, film cutting, code printing, sterilizing in ultraviolet radiation and cup-falling in one operation.

It has function of automatic film position regulation. Large power AC motor driving mechanism is adopted. For 4 cups model, it can either driven by motor or pneumatic method. Famous brand “OMRON” and “AirTAC” are applied to electric components and pneumatic elements. In addition, it can be customized according to your special requirement.

Specification

Model	BG32A-1
Power	220V 3.5KW
Capacity	16 cups/min
Temperature	0-300°C
Seal materials	PE/ALUM
Machine size	2600*800*1700mm
Weight	500KGS
