

Biscuit Packing Machine (Without Tray) DXD-460C/460L

Application

The biscuit packing machine without tray is suitable for packing biscuit and similar products.

Main Features:

A. Safety

RezPack biscuit packing machine without tray has safety operation, with the help of automatic error display, safety shield and safety switch.

B. Intelligent zed control

This no-tray biscuit packer comes with an intelligent zed temperature control system, which can store 10 pieces of parameter information. The touch screen displays operation indication, error signal and quantity, and is easy to operate.

C. High efficiency

The biscuit packing machine adopts famous servo motor to ensure steady performance. The use of double shaft device helps reduce time to stop the machine.

D. Long service time

The spare parts are easy to change, and the complete mechanism is designed to have long service life.

E. Low noise

The biscuit packing machine without tray makes use of synchronization belt, which has low noise.

F. Material saving

Dispensing with tray, the no-tray biscuit packer is material saving and decreases contamination to the environment.

Main Specifications:

Machine name		Biscuit Packing Machine Without Tray
Production capacity		30-100bags/min
Packing range	The length of bags	100-220mm(adjust range is 0.5 inch)
	Width	40-100mm
	Height	30-80mm
Gross power		3.3kw
Power supply		220V 50Hz
Gross weight		1200kg
Overall dimensions		3800*3200*1500mm
