

RS - 319 sauce packing machine

This machine is for viscous body, suspending agent, bean paste and so on the implementation of the automatic packaging materials designed three sets of roller vertical packaging machine, can realize the trilateral sealing or rectangle sealing packaging. The machine adopts the advanced high performance double frequency converter and PLC control system, equipment operation is simple to learn. A fast implementation using color touch screen setting and modification of various parameters. The sealing roller way, make neat appearance of the product, perfect sealing. Into packaging bags, packaging by pneumatic pump metering device is suitable for liquids, viscous body, packing, etc. Cut off the way can be used in a flat knife, serrated knife, point marking knife is one of the three. And equipped with open bags of ease of cutting device.

Scope of application: tomato paste, sesame paste, chicken sauce, chili sauce, beef paste, instant noodles, etc.

Chemical categories: shampoo, conditioner, shower gel, hand cream, honey, such as in the ointment.

Technical parameters:

Model	RS - 319
Pouch length	45-180mm
Wide range of bags	Three edge sealing: 30-95 - mm four edge sealing: 35-100 - mm
Measuring range	5g-90g, 50-150g
Packaging speed	30-150 Packages/minute
Power	3KW/AC380V3P
Size of machine	Length 1200 mm width 1000 mm to 1800 mm high
Machine weight	450KG
Packing material	All kinds of conform to the packaging film. Volume membrane diameter 400 rolls of film ϕ Canon 400 or less
