

DXD-1000C Type Pellet Packing

The newly developed DXD-1000C Type pellet packer of our company adopts the world advanced PLC technology and has realized the mechatronics main control elements are all using the world famous brand products with reliable and stable performance, and its advanced design is convenient for you to carry on the machine operation, adjustment and maintenance. Therefore it is the first choice for you to pack materials.

Main characteristics

Separate packing, the whole process is automatic control
Nitrogen gas filling, Extend the shelf life of the products
Photo-electric detection, the trademark can be guaranteed to have a compact pattern
Carbon tape printing, up to the national standard
Tooth-shape cutting edge, Make the outer appearance of the products much more attractive

Application scope

Expansion category: popcorn, etc.
Roasted seeds and nuts category: peanut kernel, watermelon seeds, etc
Pellet category: seeds, rice, sugar, etc.
Powder category: oatmeal, etc.
Medical and chemical category: Washing powder, alkali, pesticide pellets, etc.

主要技术参数 Main Technological Parameter

制袋尺寸 Bag-making dimension	70-270 mm (宽) 50-360 mm (长) 70-270 mm (Width) 50-360 mm (length)
包装速度 Paking speed	900-3600袋/小时 900-360 bags/hour
计量精度 Counting precision	±1-10g (视物料及包装重量而定) ±1-10g (Depending on the materials and packing weight)
功率 Hores power	3.5kw
气源 Gassource	0.3m ³ /min 0.7mpa
机器重量 Machine weight	About 860kg
外型尺寸 Overall dimension	1050×1385×1440mm
