

BG60A-6 Full Automatic Plastic Cup (Box) Filling Sealing Machine

DESCRIPTION

Automatically finish the processes of falling cups, filling, sealing, date printing, cutting the edge, photoelectric control device and UV sterilization.

It is mainly used in the industries like: bean curd, milk, fruit juice, and mineral water, jelly and so on.

The machine use Japan Omron programmable logic controller, CIP automatic Cleaning Barrel, Taiwan pneumatic control components, Intelligent Digital Display Temperature Control System, Sealing with high strength, good sealing, and low failure rate.

In addition, it can be customized that according to your special requirements

TECHNICAL SPECIFICATIONS

Model	BG60A -8
Power	220V3.5KW
Capacity	3600 cups/h
Filling Range	50-250ml
Temperature	0-300°C
Seal Material	PE PP PE/PET
Air Source	0.4m ³ /min 8bar
Weight	500Kg
Overall Dimension	3000×820×1550mm
