

MT-36W Series of High-speed Full Automation Bottle Cap Molding Folding Machine

Basic Equipment

Control system: Imported PLC+Temperatur control module+Imported touch screen+Import photoelectric detection

Air drive system: Import SMC

Extrusion system: Hardened-gear speed reducer+Inverucer+Inverter+Energy-saving heater

Function

- Low pressure alarm/mould data storage
- Temperature PID control, make sure the high quality and high accuracy of plastic products
- If the electric heating temperature do not reach at the setting temperature, the cold slug prevent from starting.
- Monitor, calculate, alarm, self-diagnosis failures device.
- Gas tank filter obstruction alarm
- Temperature deviation alarm /oil temperature deviation alarm/mold temperature deviation alarm
- Can supply cap detection system

Technical parameters

- Min.cap diameter: 25mm
- Max.cap diameter: 30mm
- Min.cap height: 10mm
- Max.cap height: 30mm
- Output cache day: 580000-720000caps
- Power: 66KW
- Voltage: 3AC/N/PE 220V/60Hz 380V/50Hz 415V/50Hz 440V/60Hz
- 0.8MPa 1m³
- Mold cavity number: 36 cavities
- Contour dimensions: 4600x3800x2600mm
- Machine weight: 7T
