

## *SF Series of Universal Packaging Machine*

### **Features:**

SFA1 single servo packaging machine servo control bag length, frequency control; single longitudinal seal + under the clip transport belt traction.

SFA2 dual servo packaging machine servo motor speed control and control bag length; single vertical seal + under the clip transport belt traction.

SFC2 dual servo automatic film packaging machine

SFC3 three servo high speed automatic film packaging machine

SFC4 four servo high-speed automatic film packaging machine open box, cantilever drive, servo speed and control bag long double vertical seal design, suitable for high-speed requirements of small portable packaging.

SFC1 single servo packaging machine open box, cantilever drive, servo control bag length, frequency control, double vertical seal traction, suitable for inflatable products and portable small product packaging.

SFE2 dual servo packaging machine open box, cantilever drive, servo control bag length, frequency control, double vertical seal traction + under the clip transport belt, suitable for box products or heavy category of product packaging.

use:

SF series packaging machine for a single item packaging. According to the design structure, control system and the size of the packaging of different sizes into a variety of series and models to meet the different needs of different users.

model	450/99	450/99-2	450/120-2	450/120	450/150	590/120	590/150
Package material width	< 450mm	< 450mm	< 450mm	< 450mm	< 450mm	< 590mm	< 590mm
