

## Vertical Form-Fill-Seal Machine For Liquid SBM-VFFSL500

This machine is a vertical and liquid packing machine. It can automatically complete the full process of bag-making, filling, sealing, printing number, cutting and counting and so on. Controlled by microprocessor. And the photo-electricity sensor can automatically track color code, allocated accurately and reliably. It is the most advanced liquid packaging machine in domestic market at present. So the machine is widely used in the packaging of milk, soy milk, soy sauce, vinegar, yellow wine and various liquids.

### Features

- The machine can perform the functions of film sterilization, bag making, and printing date, filling, sealing, cutting, and counting and so on in one time.
- The heat seal temperature can be controlled automatically.
- The packaging is exquisite and smooth, and the stainless steel structure is used to meet the hygienic requirements.
- Optional: organic glass mask, color ribbon code, ultraviolet sterilization and other functions.

### Technical Info

Model	SBM-VFFSL500
Speed	up to 40 bags per minute
Bag size	(L)50-150mm (W)40-150mm
Filling range	50-500ml
Power supply	2.5kw
Voltage	220/380V 50/60HZ Optional
Machine Dimension(L*W*H)	850 x 760 x 1800mm
Machine Weight	270kg
