

Low Speed Vacuum Bag Making Unit 1000A

The 1000A vacuum packaging unit can realize full automatic feeding, weighing, bag-making, filling, shaping, vacuuming, sealing, bag cutting and finished product transportation, and can add labeling unit to make the finished product bag more three-dimensional and upright. The bulk material is packed into two - sided or hexahedral small package with high added value. The packing is fast and stable. The unit is widely used in vacuum packaging of grain, fertilizer, pesticide and other agricultural products as well as coffee powder.

Scope of application:

Powder materials (such as: coffee, yeast, milk powder, food additives, metal powder, chemical products);

Granular materials (such as: rice, grains, food, pet food, fish and shrimp feed);

Technical parameter:

Range	100g-1000g, 500g-2000g
Materiel	Powder
Model	full-automatic
Speed	6-12bag/min
Form	in bag
Products	Coffee, yeast, milk powder, food additives, metal powder, chemical products powder packaging product
