

Automatic Metal Cans Seamer Machine LT-018

This is suitable for all kinds of tin cans, aluminum cans, plastic containers, paper, cans, and other specifications round cans sealed. Quality, reliable, lightweight and easy to operate, is the ideal equipment necessary food, beverage, pharmaceutical, chemical industry and so on. The machine has two pairs (four) wheels roll seam sealing, seaming cans when stationary automatic sealing equipment. By replacing the corresponding pressure head molds can form parts of different specifications can be sealed circular cans. Therefore, this machine should have a high production capacity, with a wide range, high degree of automation, easy adjustment and operation, use and reliable features. Suitable for canning production line equipment.

Features:

- 1, The electrical part of the motor controlled by inverter, PLC control, HMI touch screen operation;
- 2, The lid controlled together with can device: When there is the can, then the lid will be allocated accordingly, no can no lid;
- 3, No lid machine stop: when there is no lid dropping, machine automatic shutdown, so make sure no can damaged;
- 4, The conveyor belt motor speed control system sleeplessly separated, simple structure, convenient operation and maintenance;
- 5, The cover and the main components made of 304 stainless steel, meet the demand of Food and Medicinal use.

Technical Parameter:

Model	LT-018
Sealing Head	1
Capacity	30-45 Pieces/min
Can Dimension	Dia.: ϕ 60- ϕ 130mm(could be customized)
	Hight:60-190mm(could be customized)
Voltage	220V 50/60HZ
Power	1.5KW
Weight	400kg
Machine Size	2000(L) \times 800(W) \times 1700(H)mm
