

## *JEV-7500 Liquid Filling Machine*

### **Features:**

JEV-7500 liquid filling machine is the main machine for the liquid production line. This machine adopts the film feeding system, leading system, sealing-cutting device, and filling components. The machine is made of stainless steel, which could meet the standard of the operating of PLC central controller. This machine has automatic adjusted device that could adjust the film running direction film length adjusting device, many sterilizing treatment. The filling accuracy is very high. The sealing is sanitary and strong It adopts the computer-human interface system. The operation is easy and reliable. It is the ideal equipment for the liquid packing machine

### **Technical parameter:**

Model	JEV-7500
Power supply	220V/50HZ
Power	1.5KW
Speed	200~600bags/h
Max packing volume	8 kg
Machine dimension	1420 x1200 x2700mm
Film width	720mm
Air pressure	0.7Mpa±0.1Mpa
