

Automatic Case Packing Station SPD 300

This machine is designed for the second packing of the flexible bags packing, which need to put into the carton case.

It has the whole function of the second packing, such like metal detecting, weight checking, bag flattening, bag sorting, bag stacking, bag filling, case erecting, case sealing, code printing etc..

Generally, it is a one station that can solve the problems in the second packing automatically.

And also keep the potential function for the third packing, like case weight checking, case stacking etc., to achieve the whole automatic system from 1st packing to storage warehouse.

Technical Parameters:

Name	SPD 300 case packing station
Power	5kw
Bag size range	Length 80-350mm Width 80-250mm Size can be customized
Case size range	Length: 250-500mm Width:190-400mm Height:160-400mm Size can be customized
Row quantity	1-5rows as factual request
Layer quantity	1-5 layer as factual request
Film width	Max. 800mm
Bag stacking speed	Max. 300PPM
Case erecting speed	Max. 35cases/min
Size	5500*3500*1850mm
Weight	About 1200kg
Electricity	380V/50HZ/3P
Compressed air	0.4-0.8Mpa, 0.6m ³ /min
