

## 550H Automatic Four Station Thermoforming Machine

This kind of Automatic Four Station Thermoforming Machine is special designed for PP and PS PVC Film. This machine is suitable for any of thermoforms plastic sheet. It is mainly made up by four Parts: Forming the products, Punching, Cutting and Stacking the products. It is updated according to the mostly development technical, compare with the traditional machine, it can solve many impossible commitment. In addition, the Automatic Four Station Thermoforming machine can form and cut neatly and clearly. Cutting Off the product in order. It is also good for PET, PVC, etc. It is very popular with our customers all over the world because of long service life and high cost effective.

### Specification:

Model	550H (Up & down heater)
Punch Frequency	10-35 punch/min
Material	PP/PS/PET/PVC/PLA
Max. Forming Length	350mm
Max. Forming Width	550mm
Max. Forming depth	70mm
Upper and Lower Forming Power	Top heater 43kw, bottom heater 41KW
Total Power	380V 50HZ 97KW Three-phase and four-wire
Water Consumption	0.3m <sup>3</sup> /h (Tap water or recycle water)
Air Pressure	0.5-0.8(mpa)
Exhaust Volume	≥0.6 m <sup>3</sup> /min
Pressure of water supply	0.2MPa
Machine overall size (L×W×H)	5000*1675×1900mm
Area cost	8700*3600
The maximum width of material	580mm
Weight	5500KG
