

Powder Weighing Filling Machine – CE-500/FMJ

The new system computer board. Custom adapted more durable and stable convenient, advanced technology, more reliable, mature and professional technology.

Modified racking machine, can be separated into fine powder, different can achieve powder will not stick to weighing hopper.

Can automatically weighing and measuring the repackaging, multifunction change packing, suitable for goods sort is more, stainless steel shell, well-presented and high-end.

All intelligent design, simple operation, infrared induction switch induction block feeding, quantitative precision sensor, 3 levels vibration cutting, adjustable, microcomputer motherboard is more durable and energy saving, quick speed, small error, high performance, filling, bag, a minute about 10-20 bags depending on different items, quantitative, 1-1000 grams close between people according to their own needs in the computer board set above regulation.

Technical Parameters:

Model	CE-500/FMJ
Brand	FULLWELL
Voltage	220v 50/60Hz
Power	150w
Material	SS304
Filling range	5-500g
Filling accuracy	0.2-1g (Depends)
Filling speed	10-20 bags/min
Speed rating	Fast, middle, slow
Dimension	400 x 300 x 810mm
Weight	21kg
