

Modified Atmosphere Packaging Machine WEZ-320MP/WEZ-420MP/WEZ-520MP

The product is suitable for medium and large quantities of packaging. A fully automatic hard box vacuum air-conditioned packaging machine is equipped with a high-efficiency and energy-saving Japanese Mitsubishi drive system, the whole machine is stainless steel and aluminum alloy structure, and the mold can be replaced. It can be customized according to customer needs.

It is suitable for food packaging such as dried and fresh meat, cooked food, seafood, fruits and vegetables, cakes, etc. The mixed gas is filled in the tray so that the packaged food can keep the original taste, color, shape, nutrition, and preservation period of the food for a long time. , from the automatic forming tray – manual feeding – automatic packaging – automatic cutting – automatic output. Packaging output is also particularly fast and efficient.

1. A fully automatic hard box vacuum air-conditioned packaging machine is multi-purpose, and 1 can be vacuum body-packed.
2. Inflatable (single gas) packaging.
3. Modified atmosphere packaging and other forms of packaging can be produced, and various supporting devices can be configured according to needs (such as robot feeding-decomposition conveyor belt-foreign object detection-weighing-labeling, etc.) to expand the automated production line. It saves human resources, is fast and convenient, and can meet the needs of high-capacity production and packaging.

Parameter:

Model	WEZ-320MP	WEZ-420MP	WEZ-520MP
Up film width	295mm	395mm	495mm
Down film width	322mm	422mm	522mm
Container depth	≤100mm	≤120mm	≤150mm
Voltage	13~18KW	13~18KW	13~18KW
Power customize	380V(220V)50/60H,3ph	380V(220V)50/60H,3ph	380V(220V)50/60H,3ph
Packing speed	4~5 circle/min	4~6 circle/min	5~8 circle/min
Overall size	5380*965*1880mm	6150*1080*1880mm	6200*1180*1880mm
Net weight	1820kg	2200Kg	2400Kg
