Oral Liquid Filling Capping Machine (track filling) YMGZT

The Oral Liquid Filling Capping Machine (track filling) is used for filling and capping of small volume liquid. It automatically feeds, fills, cap sorts, and cap seals.

Key Features:

- Optional Filling Methods: glass pump, steel pump, ceramic pump or peristaltic pump.
- Track filling, no bubbles, and higher efficiency.
- No bottle no filling, no capping.
- Rotary cap sealing.
- PLC controls, speed adjustable.

Technical Parameters:

- Capacity: 100-400pcs/min
- Volume: 5-25ml
- Power: 2kw
- Net weight: 800kg
- Dimension: 2400×1000×1600mm
