

Automatic Plane Labeling Machine YQTB-120

Application: Labeling on the top surface of different kinds objects, such as can, carton, bag, cap, box and so on

Features:

- Adopt imported electromagnetic clutch with best accuracy.
- The machine shell adopts high-class aluminum alloy anodic treatment, with long life span service.
- Adopt famous factory electric motor to ensure high load and long period operation.
- All parts and standard components are carefully made of stainless steel.
- With PLC control panel, liquid crystal display, the operation is simple and convenient, the function is stable.
- Imported label inspection optical coupler can ensure high precision.
- There is a code printer on the machine if you need, it also can print three lines like the expire date, valid date, batch number

Characters:

Automatic labeling machine, easy to operate, just turn the power switch one click operation on the entire device to enter production status of products are to be off the label> get items> induction start signal> a standard> label, on the whole production process to complete, simple, accurate and fast are the advantages of this product.

Technical Parameters:

Production(pcs/min)	30-150
Driving Mode	Servo motor
The way of labeling	top labeling
Conveyor speed	≤40 (m/min)
Label Specification	adhesive sticker,transparent or opaque label
The application of objects	customizing
The application of label	Height 20-70mm Length 25-120mm (can be customized)
The inner diameter of label roll	76mm
The outer diameter of label roll	350mm(max)
Power of motor (w)	500W
Power supply	AC220V 50/60HZ Single phase
Dimension (mm)	2200 (L) 900 (W) 1600 (H) mm
